## **CLAIMS**

- 1. A fluorine-containing polymer for treating a masonry, comprising:
- (1) a fluoroalkyl group-containing monomer, and
- 5 (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer.
  - 2. The fluorine-containing polymer according to claim 1, wherein the silicon-containing monomer is a compound having a silane group and a carbon-carbon double bond.
  - 3. A composition for treating a masonry, comprising: a fluorine-containing polymer which comprises
  - (1) a fluoroalkyl group-containing monomer, and
- 15 (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer, and an organic solvent.
  - 4. A method of producing a treated masonry, which comprises applying, to a surface of a masonry, a composition comprising:
    a fluorine-containing polymer which comprises
    - (1) a fluoroalkyl group-containing monomer, and
    - (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer, and
- an organic solvent, and then removing the solvent.
  - 5. A masonry produced by the method according to claim 4.
